

FINAL PROJECT PROPOSAL

Student name: _____ Date of submission: _____

The final project should demonstrate a comprehensive menu of multimedia production skills commensurate with what you learned during this course. It should be an interface of original design and concept.

(For more details please view the "Final project description" on the "downloads" page on the class Web site.)

The same grading criteria used for assignments submitted during the semester will be used when evaluating your final project.

Your project proposal is due **no later than the Oct. 1 or Oct. 2 class**. You should print out this form and attach it to the top of your proposal.

The proposal should include:

- Description of proposed final project
- Complete user/audience profile
- Sketch or description of information architecture or use-case scenario
- Rough storyboard sketches of at least one major narrative point.
- Justification for design of visual elements in interface.
- Inventory of all digital assets you plan to use and their origin.

For instructor use
